13. melléklet

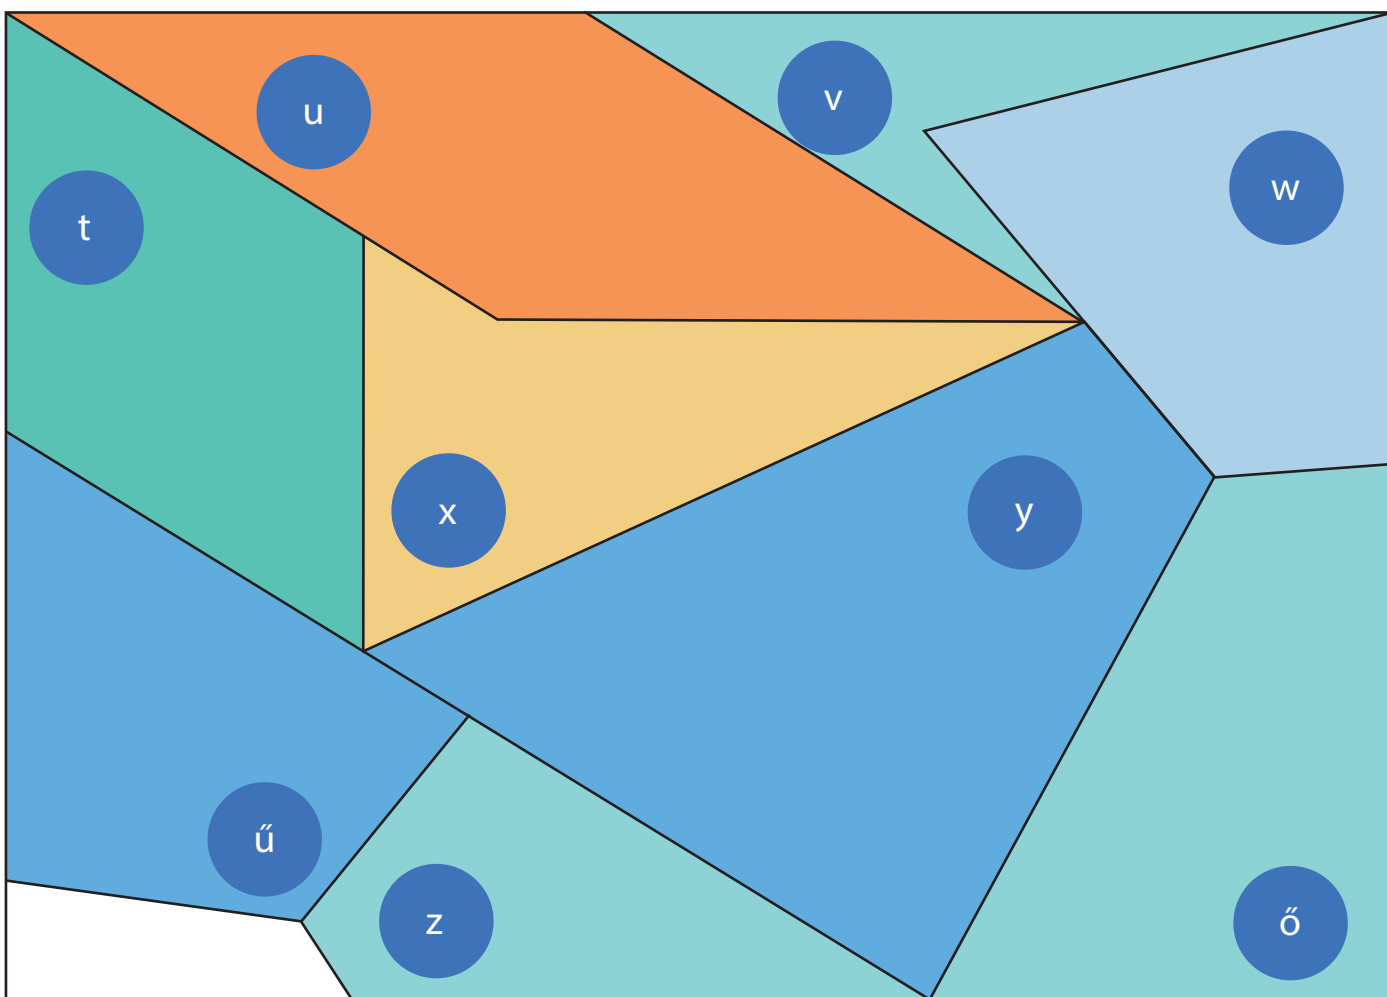

14/A melléklet

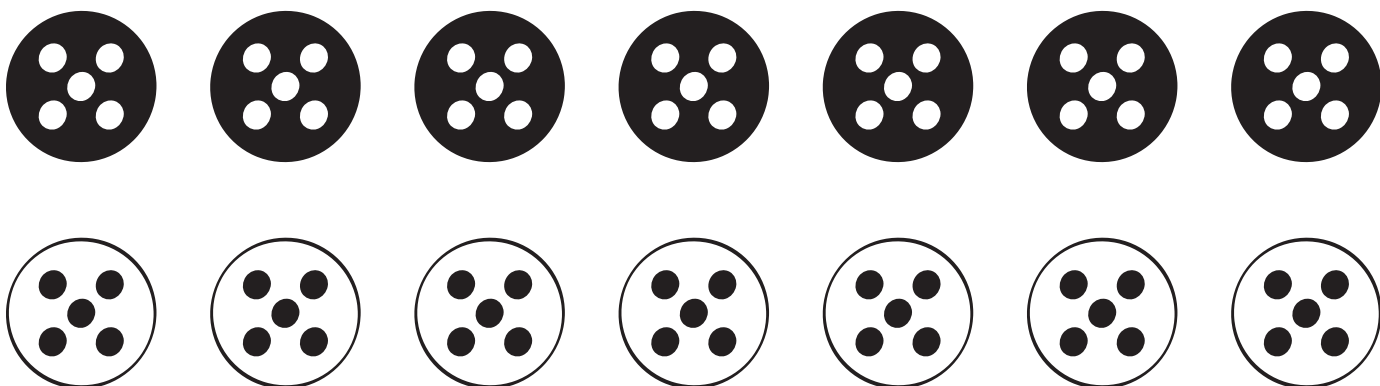

Nyírd ki a következő négyszögeket nagyon pontosan! Őrizd őket borítékban!
Többször fogod használni őket.

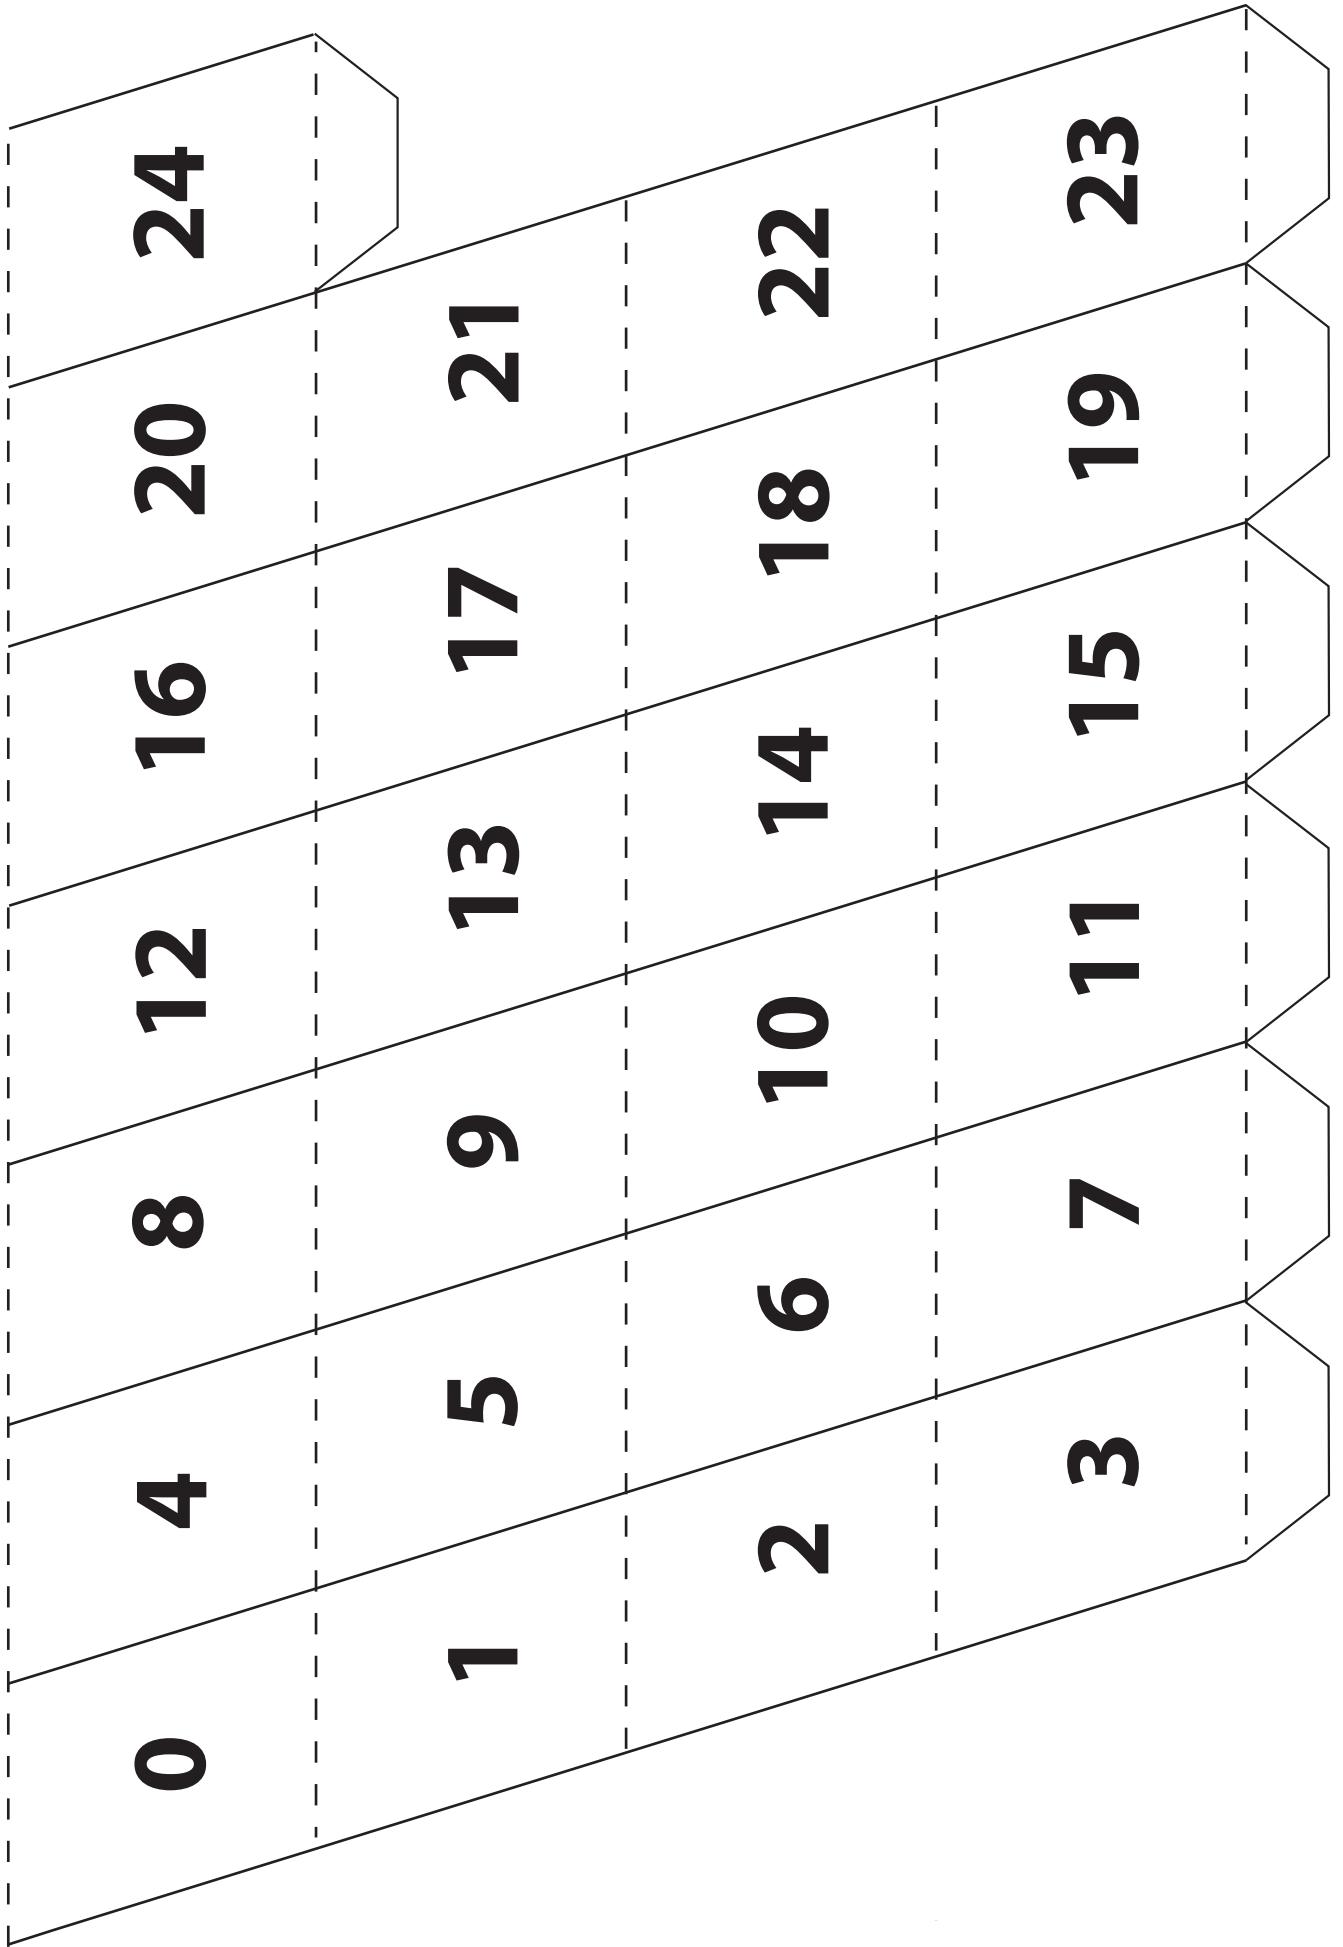

18. melléklet

A 7. mellékletben találsz a színes hasábot, amire ezt a számcsíkot fel tudod tekerni.

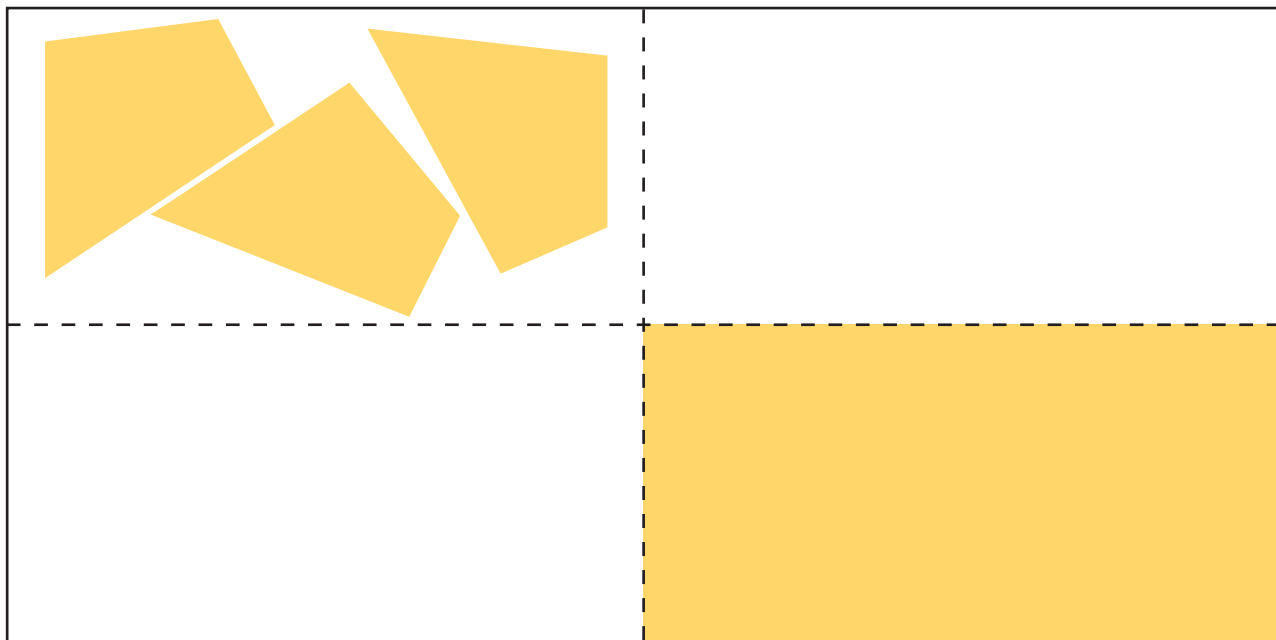

Először az egész lapon végezd el a hajtogatást: mindegyik **szaggatott vonal** mentén hajtsd meg a lapot, és ezeket a hajtásokat élezd le (nem túl nagy erővel)!

Utána – ismét kisimítva a lapot – vágd szét a csíkokat a folytonos vonalak mentén! A számok nagyságrendje szerint ragaszd egymáshoz a csíkokat, így tudod majd felcsévélni az elkészült hasábra a számcsíkot.

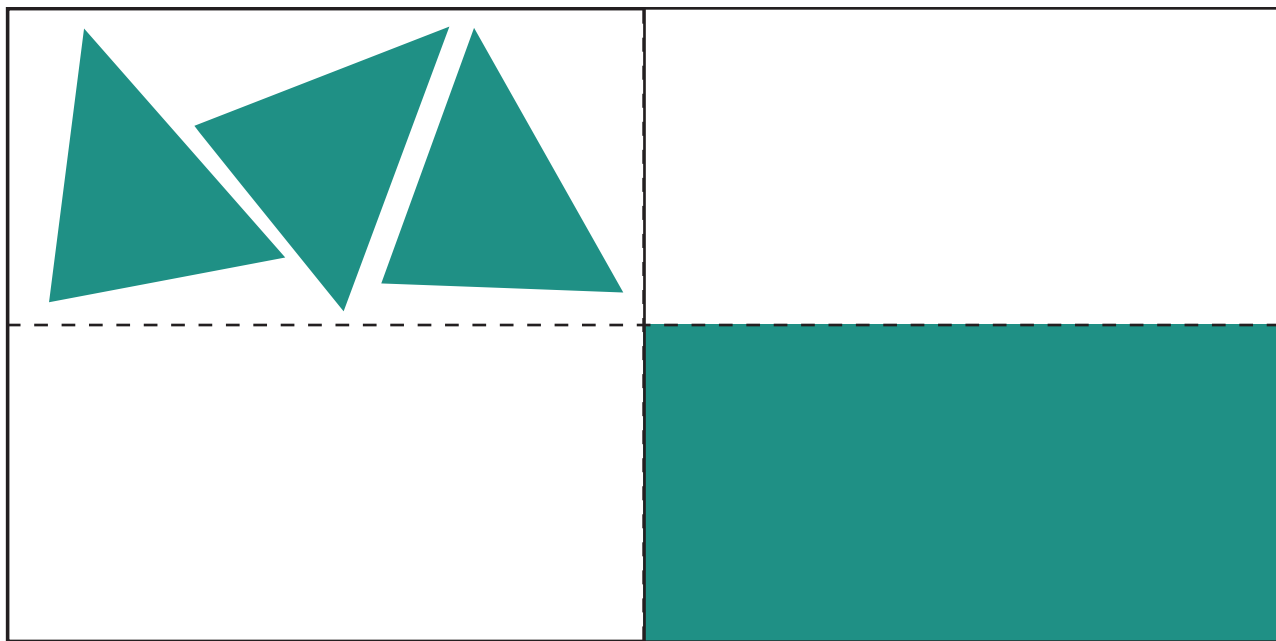

A honlapon találsz folytatást a számcsíkhöz:

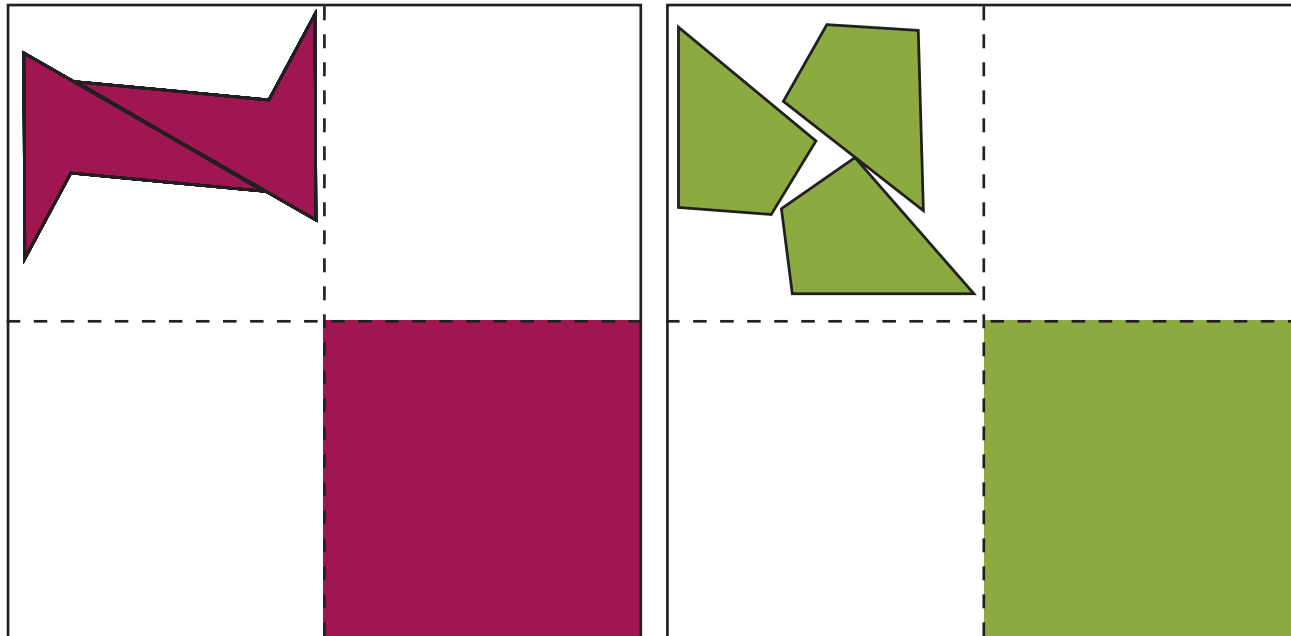

Hajtsd össze ezt a lapot a szaggatott vonal mentén! Így nyírd ki ezt a 3 négyszöget! (Így lesz 12.)

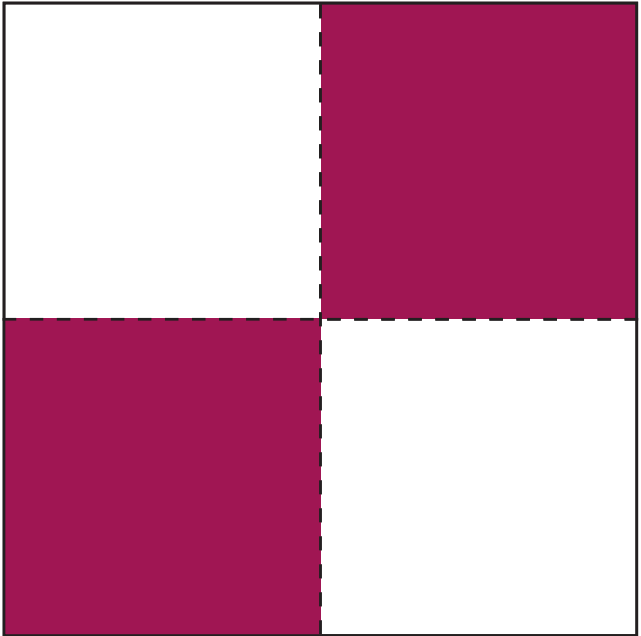

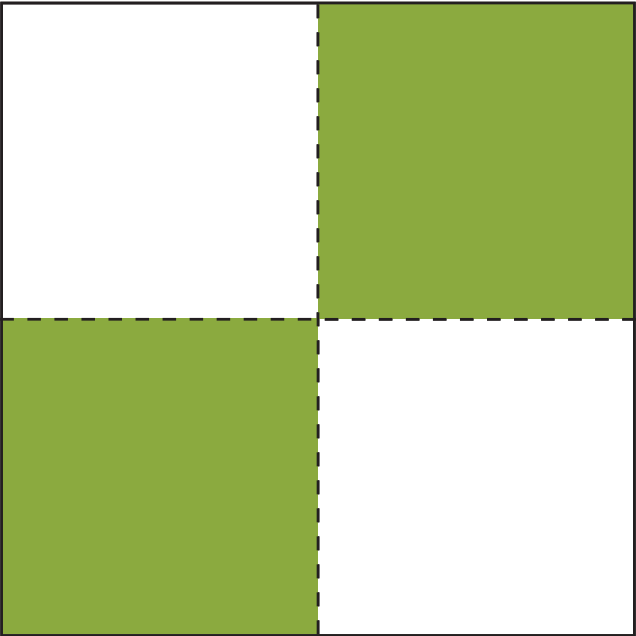

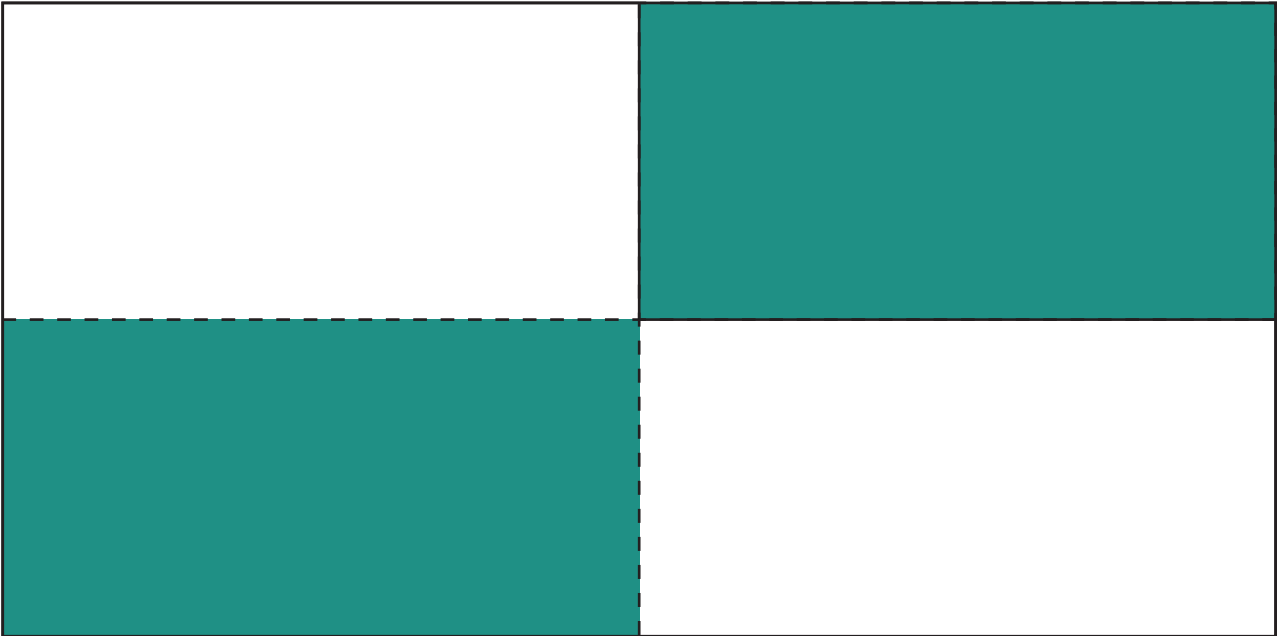

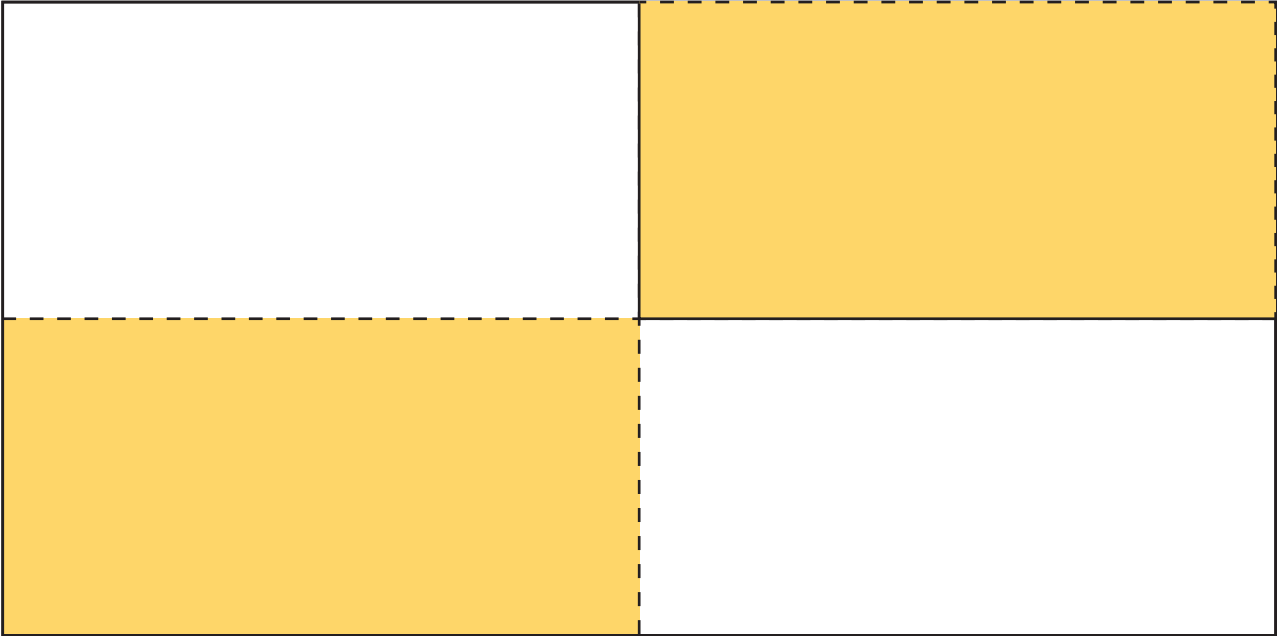

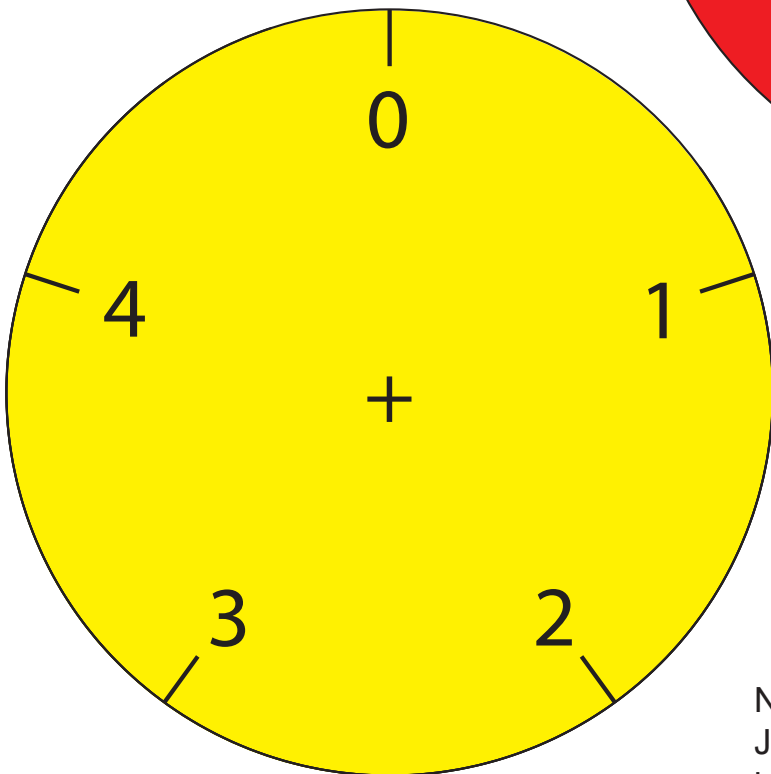

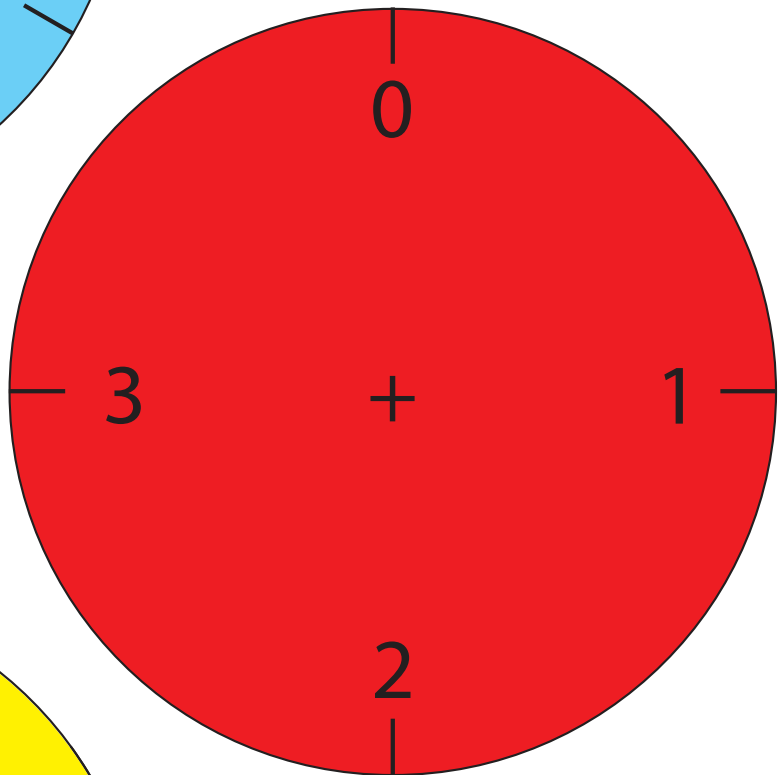

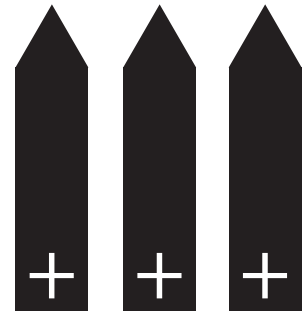

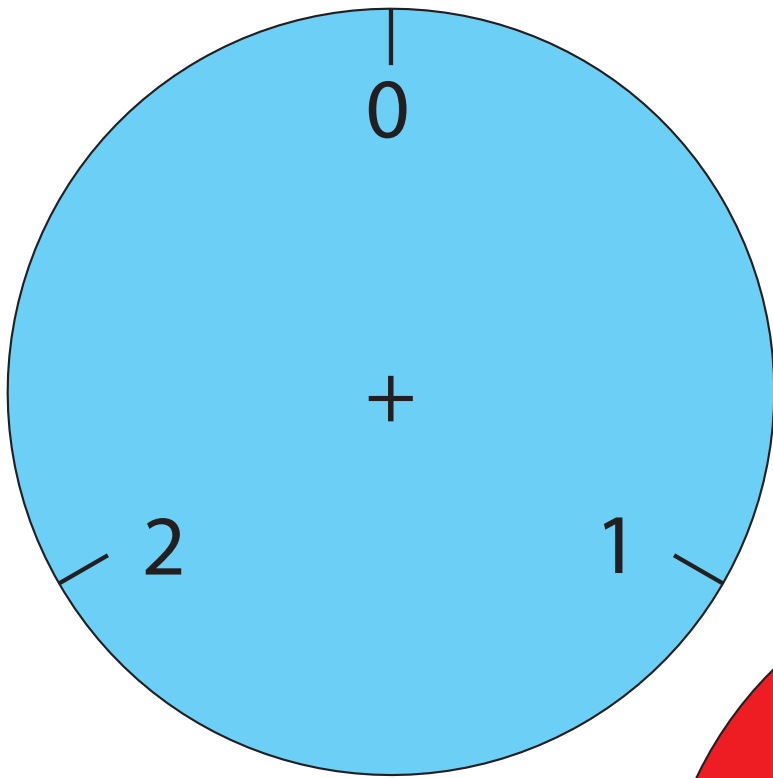

A háromszögeket is négyrét hajtott lapból nyírd ki!

Ezeket a négyszögeket is az összehajtott két lapból nyírd ki!

Nyírjátok ki ezeket az órákat és a mutatókat!
Jancsiszöggel rögzítsétek a mutatót az órá-
hoz! Így a mutató körbe-körbe járhat.
